TUESDAY, MARCH 23

Judge Ernest S. Clarke, of Falmouth, has entered the race for Appellate Court Judge in the Eastern district, against Judge Thos. H. Payater.

Gov. Zayas, sent from Santo Domingo to Asua, 55 miles south, to be governor was assassinated, together with his two children, the third day after his arrival.

The Supreme Court will shortly pass upon the constitutionality of the Webb-Kenyon liquor bill on test cases appealed from Kentucky, West Virginia and North Carolina.

Gov. Spry, of Utah, vetoed a statewide prohibition bill on the ground that it is a question upon which the people have a right to express themselves, the legislature not having been elected on that issue.

The British government is proceeding with a plan to mobilize women to take the places of men needed in the war. More than 700 women in London voluntarily registered for the purpose the first day.

The United States government is testing at Bledsoe's island a wireless telegraph instrument weighing only eight pounds that will send a message 30 miles. It can be carried in a small satchel and has sent messages successfully for 21 miles.

The Dixie Highway from Chicago to Jacksonville will come by Elizabethtown and Bowling Green because it will be the best road.—Elizabethtown News.

But the Dixie Flyers and other trains between the two points will continue to go through the only town on the map.

Austria's reply to Italy is that any territory she should agree to cede should be conveyed after the war, when Italy has fulfilled her part of the agreement to remain neutral. In other words, Austria is not willing to pay in advance, while Italy is not willing to wait until a time when Austria may not have the goods to deliver. In the meanwhile, Germany is pressing Austria to make any sacrifice, while a strong peace party has arisen in the part of Austria occupied by the Russians, urging that Austria make peace regardless of Germany.

The present Democratic platform declaring for the County Unit Law in Kentucky is the law of the Democratic party until changed by the same authority that made it. A candidate for Governor, or any other office, who bolts his party's platform on this question and attempts to make a different one to suit himself is taking a position that loyal Democrats will be under no obligation to endorse at the polls. If we do not provide a new platform for the candidates to run on this fall, the old will represent the party's principles and a candidate holding to other principles is not a good Democrat. Isn't that a plain proposition, clearly stated?

The U. S. Circuit Court of Appeals at San Francisco has affirmed the lower court in the convictions under the White Slave law of F. Drew Caminetti and Maury I. Diggs, society leaders of San Francisco and married men. Diggs and Caminetti were tried and convicted before District Judge William C. Van Fleet in 1913, for the transportation of Lola Norris and Warsha Warrington from Sacramento, Cal., to Reno, Nev., for immoral purposes. Diggs was sentenced to imprisonment on McNeil Island for two years and fined \$2,000. Caminetti was sentenced to eighteen months' imprisonment and was fined \$1,500. The case was taken to the higher court on a writ of error.

DAIRY

TESTS OF DAIRY PRODUCTS

Apparatus Constructed at Suggestion
of Wisconsin Experts Will Show
Amount of Dirt in Milk.

(By S. M. BABCOCK and E. H. FARRINGTON.)

There is a growing demand among milk consumers as well as dealers and manufacturers of high-grade dairy products for a new test that will show the cleanliness and purity of each lot of milk received. The testing of milk at creameries and cheese factories is usually confined to a fat determination by the Babcock test. The acid is also used more or less for inspecting different lots of milk and cream.

A fairly good idea of the extent to which each lot of milk has been contaminated may be obtained by a test that will show the amount of dirt contained in a definite quantity of milk.

A milk sediment test, which was constructed by E. H. Farrington, Madison, Wis., according to suggestions made by the writers, is herewith described. This test may be used for testing a large number of lots of milk. Samples of one pint of milk will filter through it as fast as each lot is ready.

The inside cylinder is two and one-half inches in diameter and six inches long. It is funnel-shaped at the bottom, terminating in an opening about an inch in diameter. A cap on the bottom contains a wire gauze strainer on which a thin disk of absorbent cotton is placed.

Details of Construction of Milk Sediment Tester. The Central Cylinder A Through Which the Milk is Poured is Surrounded by a Steam or Hot Water Jacket With a Half-Inch Intervening Space—The Steam or Hot Water Enters at the Lower Opening and Overflows at B—The Brass Cup C Slips Over the Bottom of the Inner Cylinder and is Held in Place by a Clamp Rod D—This Cap Contains a Circle of Wire Gauze E Over Which is Placed the Disk of Absorbent Cotton—The Cap May Be Quickly Removed by Swinging the Clamp Rod D to One Side and the Dirty Filter May Be Replaced by a Clean One.

ton is placed. This cap is easily attached to the apparatus by means of a hinged wire loop.

After a sample of milk has been filtered through the apparatus, the cap containing the gauze and the cotton filter is detached and the cotton disk placed on a piece of white paper to dry. This cotton contains the dirt and sediment collected from one pint of milk. The amount of dirt obtained will vary with different lots of milk and the disk when dry may be returned to the milk producer as evidence of the degree of cleanliness of his milk.

Each cap should have a number stamped in the metal and as fast as one lot of milk is tested the cap may be removed and another put in place for the next sample. The absorbent cotton disks used as filters are stamped out to fit the cap and wire gauze. The success of filtering depends largely on the texture of these disks which should be made of absorbent cotton that contains no starch or "sizing." The latter have a glossy surface, but the "unsized" cotton or cotton batting cut out in the shape of round disks about one-eighth inch thick allows the hot milk to filter rapidly through it and retains the fine dirt which is suspended in the milk. The milk is kept hot in this tester during filtering by means of a hot water jacket surrounding the inner cylinder.

KEEP THE CALVES GROWING

Large Barrel and Digestive Organs
Should Be Developed by Feeding
Good Quality of Roughage.

Calves should be kept growing continuously and vigorously from birth. No grain should be fed after the calf is six months old if it can be kept in proper growing condition without it. A large barrel and digestive organs should be developed by feeding a good quality of roughage when not on pasture. After calves have reached six months of age they can be grown better and cheaper on good pasture or corn silage and good alfalfa hay than on any other feeds, and, as roughage is cheaper than concentrates, these are the feeds from which we wish the mature animals to have the ability to get more of their nutriment.

Heating Milk for Calves.
When heating milk for calves it is best to place the vessel containing it in a pan of hot water, then there is no danger of its being burnt or boiled.

Rosy As A Girl.

Summit, N. C.—In a letter received from this place, Mr. J. W. Church, the notary public, says: "My wife had been ailing for nearly 12 years, from female ailments, and at times, was unable to leave the house. She suffered agony with her side and back. We tried physicians for years, without relief. After these treatments all failed, she took Cardui, and gained in weight at once. Now she is red and rosy as a school girl." Cardui, as a tonic for women, has brought remarkable results. It relieves pain and misery and is the ideal tonic for young and old. Try it. At all druggists.—Advertisement.

ANNOUNCEMENTS.

We are authorized to announce

HON. A. O. STANLEY,

a candidate for the Democratic nomination for Governor, subject to the action of the primary August 7th, 1915.

We are authorized to announce

HON. HENRY M. BOSWORTH

of Fayette County, as a candidate for the Democratic nomination for Governor of Kentucky, subject to the primary election August 7th, 1915.

We are authorized to announce

HON. JAMES B. ALLENSWORTH of Christian county, as a candidate for the Democratic nomination for Commonwealth's Attorney, for the Third Judicial district, composed of Christian, Calloway, Trigg and Lyon counties.

We are authorized to announce

HON. DENNY P. SMITH,

of Trigg county, a candidate for re-election as Commonwealth's Attorney of the Third Judicial District of Kentucky, subject to the action of the Democratic party at the primary election, Saturday, August 7th, 1915.

We are authorized to announce

CLAUDE R. CLARK

as a candidate for the Republican nomination for Clerk of the Christian County Circuit Court. Primary August 7, 1915.

We are authorized to announce

JUDGE GUSTOMAS

of Graves county as a candidate for the Democratic nomination for judge of the Court of Appeals from the First district, subject to the Democratic primary election Aug. 7, 1915.

We are authorized to announce

JUDGE J. T. HANBERRY,

of Christian county, as a candidate for re-election as Judge of the Third Judicial District of Kentucky, subject to the action of the Democratic primary election Aug. 7, 1915.

We are authorized to announce

HON. THOS. S. RHEA

as a candidate for the Democratic nomination for Auditor of Public Accounts, subject to the primary August 7, 1915.

Jas. B. Allensworth.

Democratic candidate for Commonwealth's Attorney, subject to the primary election Aug. 7, 1915, will fill the following County Court day appointments in the four counties of the Third Judicial District. His opponent, Hon. Denny P. Smith, is invited to be present and accept a division of time.

Monday, March 22, Eddyville.

Monday, April 5, Hopkinsville.

Monday, April 12, Cadiz.

Monday, April 26, Murray.

Speaking to begin at 1:30 p. m.

Not Infallible.

The new system of memory training was being taught in a village school near Crook, and the teacher was becoming enthusiastic. "You see," he said, addressing the bright pupil, "in order to fix a thing in your mind you should conjure up some sort of picture in your mind's eye, representing what you want to bear in mind." "Yes, sir," said the bright pupil; "it sounds very nice, and I've no doubt the advice is excellent if you could tell me what it means." "Well, for instance," said the teacher, "supposing you want to remember the name of a poet—Bobby Burns. Fix in your mind's eye a picture of a policeman in flames. See—Bobby Burns!" "Yes, I see, sir," said the bright pupil. "But how is one to know that it does not represent Robert Browning?"

LIVE STOCK

METHOD FOR DOCKING LAMBS

Operation Should Be Performed When
Youngsters Are About Ten Days
Old—Short Tail Desired.

Docking should be done when the lambs are about ten days old. The easiest method is to place the lamb between the operator's legs, its rear end in front of him. The operator lifts the tail and with a heavy knife pushes the skin half way on the underside of the third vertebra back to its junction with the second. Then with a sharp cut he severs the tail at this point. Many shepherds leave the tail one vertebra longer, but a short tail is greatly to be desired since it cannot collect so much manure.

Very seldom, if the lamb is docked early, will there be sufficient bleeding to cause any material harm. If profuse bleeding does occur, a cord should be tied very tightly around the stump of the tail. Pincers heated to a high temperature, may also be used for this purpose, and by many are preferred. The tail is severed by closing them upon it. The stump is seared or burned, which completely prevents bleeding. However, a burn will not heal so quickly as a clean cut, and in the former condition suppurative or the formation of pus underneath the scab may occur.

Of course, there is a greater liability of dangerous infection where the knife, without cauterization, is used, since the seared surface tends to prevent the entrance of bacteria. Infection, however, can be avoided by the maintenance of cleanly and sanitary surroundings. The pincers can satisfactorily be adopted for docking lambs several weeks old, when the contingency of bleeding is more likely.

MAKE PROFITS WITH STEERS

Animals Must Have Good Beef Characteristics, a Wide, Strong Back and a Large Heart Girth.

How to select steers that will make good gains and return substantial profits should be well known by the man who plans to market his crops as feed this fall or winter.

John L. Torney of the University of Wisconsin Agricultural Experiment station, is urging cattle feeders to look for the following characteristics in animals which they intend to finish for the market:

"Steers, if they are to make profitable gains in the feed lot, must have beef characteristics, a wide, strong back, and a large heart girth.

"They must have a strong frame and plenty of room for the vital organs. For an animal with a weak constitution can not hold up through the feeding season.

"A wide head and muzzle, which usually indicate good feeding qualities.

"Short legs, heavy hindquarters, and arched ribs are essential in the feeding animal.

"The skin should be reasonably thick, soft, and covered by a heavy coat of hair.

"The animal should have a straight back and low set appearance, due to the depth of body and short legs."

CONVENIENT TO SLOP SWINE

Handy Device Attached to Any Ordinary Trough Prevents Hogs From Interfering With Pouring.

Here is a handy device for feeding hogs. To any ordinary trough attach an upright box 2½ feet long and 8 by 4 inches in diameter, flaring at the top, writes Joseph Volden of Westby,

Good Way to Slop Hogs.

Wis., in Missouri Valley Farmer. The pigs can never interfere with the pouring of slop into the trough, and they will soon learn to wait for their drink at the bottom of the spout.

Selection of Breeding Sows.

Select the breeding sows from early spring litters when they are six months old. One can form an opinion which ones are most likely to prove long-bodied, good-formed, of quiet disposition, good feeders and with a tendency to grow frame and size rather than put on an excess of fat. Breed the gilt when about ten months old and if she proves herself a good breeder, raising uniform litters of strong, healthy pigs, keep her for several years, or as long as she is profitable.

No Place for Misfit.

Breeding of horses must be done intelligently, because there is no place in the market for a misfit.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Dr. J. C. Fletcher, and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

WAR! What Is It All About?

HAS the whole world gone stark mad over a very foolish and trivial question? Are swords rattling, cannon rumbling, mailed armour glistening just because Russia wanted to show her love for the little brother—Serbia?

Tear aside the curtain of Europe's politics and see the grim and sinister game of chess that is being played. See upon what a slim, yet desperate, excuse the sacred lives of millions may be sacrificed. Read the history of the past one hundred years, as written by one of the greatest authorities the world has ever known, and learn the naked, shameful truth. Just to get you started as a Review of Reviews subscriber, we make you this extraordinary offer. We will give you

FREE!

Duruy's History of the World

Four splendid cloth volumes, full of portraits, sketches, maps, diagrams

Today is the climax of a hundred years of preparation. Read this timely, authoritative, complete, AND THE ONLY CONDENSED classic world history—of which over 2,000,000 copies have been sold in France alone—just what has taken place in the inner councils of Europe during the past one hundred years. Read in these entrancing pages how Russia has for years craftily been trying to escape from her darkness—to get a year-round open port, with its economic freedom. Read how Germany and Austria, fearful of the monster's latent strength, have been trying to checkmate her and how they have pinned all in this last, supreme stake.

The Lesson of the Past

THIS master of the pen shows you the glory that was Greece's and the grandeur that was Rome's. He guides you through the Middle Ages, the picturesque old days of chivalry and the crusades through the Renaissance up to contemporary history, which Prof. Duruy completes in brilliant manner. In the story of the past lie the secrets of today. And you will understand them better when you get the Review of Reviews for a year—for the Review of Reviews will give you a sane interpretation of the events that are taking place with such rapidity. It is not enough to read the daily news reports. Your ability to comprehend conditions, and to discern their relation to the past, is a true interpretation of the meaning and the "reason why" of events. In your mind you must bring order out of chaos—and the Review of Reviews will do it for you.

Get the
REVIEW OF REVIEWS
for a Year

Send the coupon only. It brings the whole set—four volumes—charges prepaid—absolutely free. All we ask is that—after you get the books and like them—you send 25 cents for shipping and \$1.00 a month for three months to pay for the Review of Reviews. If the books aren't worth more than you pay for books and magazine to get, send them back at our expense. But be prompt. The world-wide fame of Duruy will make these 5,000 sets disappear from our stock room at once. Send your coupon today—and be in time.

For cash with order send only \$1.00 and will pay shipping charges.

The beautiful 16 leather set costs only a few cents more. For a set of this luxurious binding, charge 5 months above to 5 months, or send \$5.00 cash in full.
